snafiul700@gmail.com

Web developer

Results-driven and detail-oriented **Junior MERN Stack Developer** with a solid foundation in **React.js, JavaScript, Node.js, Express.js, MongoDB**, and **RESTful API development**. Proven ability to build responsive, user-friendly web applications using modern JavaScript frameworks and libraries. Strong understanding of full-stack development and hands-on experience in creating scalable front-end and back-end solutions. Adept at writing clean, maintainable code and debugging issues efficiently. Eager to contribute to collaborative development environments and continuously expand technical skill sets with emerging technologies.

EDUCATION

In progress in English

Abu Abbas Collage, Netrokona

Netrokona, Bangladesh • 01/2024 – Present

PROJECTS

URL Shortener

07/2025 – 08/2025

Technologies: React, Tailwind CSS, Node.js, Express.js, MongoDB

- Developed a responsive full-stack URL shortener web app where users can register, shorten links, and view analytics.
- Built RESTful APIs with Express and MongoDB for user and URL data management.
- Implemented secure login and token-based authentication using JWT.
- Deployed frontend to Vercel and backend to Render with environment-based config.

Hirred (Job Portal Website)

03/2025 – 04/2025

Tech Stack: React, Supabase, Clerk, shadcn UI

- Developed **Hirred**, a job portal where users can register as **candidates** or **recruiters**.
- Built recruiter features to post, edit, and manage job listings; enabled candidates to search and apply for jobs.
- Integrated **Supabase** as the backend database for real-time data operations.
- Implemented secure, role-based authentication and user management with **Clerk**.
- Designed and styled the user interface using **shadcn UI**, creating a modern, responsive experience across devices.
- Added job search and filter functionality by location to improve candidate usability.

Forever (eCommerce Website)

01/2025 – 02/2025

Tech Stack: React, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a complete eCommerce website called **Forever** using the MERN stack, allowing users to browse, search, and purchase products.
- Developed RESTful APIs with **Express.js** and **MongoDB** for managing products, user data, cart, and orders.
- Implemented a dedicated **admin panel** for managing products and orders with secure, role-based access.
- Designed a modern, responsive UI using **Tailwind CSS** for both user and admin interfaces.
- Secured user sessions with **JWT authentication** and protected routes for both users and admins.
- **Deployed the frontend on Vercel** for fast and reliable web access.
